- Training opportunities
- Subsidy for *Deutschlandticket*, job ticket & job bike
- Company pension scheme
- Special conditions for occupational disability insurance (without health questions)
- Employee discounts
- Free parking (also with electric charging stations)

Elbe Flugzeugwerke GmbH (EFW) combines various aviation and technology activities under one roof: development and production of fiber composite components for aircraft, conversion of passenger aircraft into freighters (P2F), MRO services for all Airbus aircraft, and engineering services within the scope of certification and approval. As a group, the company currently employs more than 2,000 people and is on a strong growth path.

EFW is an experienced industry expert with an impressive track record spanning three decades: over 6 million composite components produced and now implemented in more than 14,000 Airbus aircraft, more than 300 converted aircrafts and numerous maintained commercial and military aircraft. More than 40 customers worldwide operate freighter aircraft converted by EFW, including the largest express air cargo companies in North America and Europe.

Today, as a center of excellence for freighter conversions, EFW offers a complete Airbus freighter family with the new A320P2F, A321P2F and A330P2F programs and also conversion sites in China, the U.S., Singapore and Turkey. EFW's parent companies are ST Engineering and Airbus. The company is headquartered in Dresden, Germany.

P2F EXCELLENCE CENTER & MRO SOLUTIONS

- + 30 years of Airbus fleet conversion experience
- + 200 converted Airbus A300/A310 medium wide body aircraft
- + STC holder for all current Airbus conversion programs
- + Paradigm shift through fuel-efficient, sustainable freighter conversion
- + STC owner for new generation of cargo aircraft
 - Long Range Segment
 - Single Range Segment
 - A320P2F, A321P2F, A330P2F
- + Quality standards "Made in Germany" and conversion performance
- + Close cooperation with ST Engineering and Airbus to increase P2F capacity worldwide
- + Integrated heavy maintenance checks and individual maintenance services

COMPOSITE SOLUTIONS

- + 30 years of experience composite manufacturing
- + Products and solutions from floor panels up to cabin interiors
- + Turnkey product solutions
- + Leading edge technologies
- + Highly automated production facilities
- + Innovative lightweight products for aviation and transportation
